

HITRUST Certification Service

Partner with Palindrome for this Critical Certification

Whether you are operating within the healthcare industry, or providing products or services to it, **HITRUST** certification is now commonly required. For many organizations, achieving certification can seem like a daunting task. It doesn't have to be.

Palindrome Technologies is the **HITRUST** certification partner you need to efficiently maneuver through the assessment, readiness, and certification steps. As your trusted advisor, your Palindrome expert is with you each step of the way. You save time and money, and avoid the pitfalls and headaches along the path to **HITRUST** certification.

“Never in my career have I enjoyed working with an assessment/audit firm before partnering with Palindrome. You don't meet many folks in the industry with their knowledge depth. They have been a critical partner in helping us navigate this landscape.”

—Allan Abrams, Chief Information &
Security Officer, Kipu Health

Palindrome's experience, built upon two decades of cybersecurity consulting to some of the world's largest network operators and equipment vendors, goes far beyond merely performing an audit or providing some "best practice" recommendations. We work with you to understand your needs, and optimize our processes and programs to them. We have the expertise and experience to help you gain **HITRUST** certification as quickly and easily as possible.

The **HITRUST** Common Security Framework (CSF) includes over 400 controls that address security, privacy, and risk management. The CSF is designed to be flexible and scalable, so it can be tailored to the needs of any organization, and helps identify any gaps or weaknesses. **HITRUST** certification is recognized by government agencies, insurance companies, and other healthcare organizations to document compliance with a wide range of regulations, including HIPAA, PCI DSS, HITECH, and the NIST Cybersecurity Framework.

Our **HITRUST** certification service includes:

A comprehensive assessment of your organization's security and privacy controls

A roadmap for remediation of any gaps or weaknesses

Assistance/coaching through the **HITRUST** certification process

Ongoing support to help you maintain certification

We will work with you every step of the way to help you achieve certification and maintain it for years to come.

HITRUST Certification Benefits

Demonstrated compliance with a wide range of privacy and security regulations

Reduced risk of data breaches and other security incidents

Improved patient and customer trust and confidence

Enhanced organization reputation

Better protection can reduce insurance premiums

Attracts new customers and partners

Improved operational efficiency

HITRUST Certification Process

The certification process is divided into multiple phases:

- 1. Readiness**
Select the appropriate assessment level for your organization (e1, i1, or r2) and identify any gaps or weaknesses in your security and privacy controls.
- 2. Remediation**
Close the gaps and weaknesses found in the readiness assessment.
- 3. Validation**
Verify that your organization has implemented the required controls, and complete the certification process.

HITRUST
Authorized CSF Assessor

As a Certified **HITRUST** assessor, Palindrome Technologies is authorized by the **HITRUST** Alliance to perform readiness, remediation, and certification assessment work using the **HITRUST** Cybersecurity Framework (CSF).
